Cape Vintages

OVER THE LAST 10 YEARS

- 
- 2011 Yet more variable than last vintage, impossible to generalise. As in 2010, producer's track record should guide the buying/cellaring decision.
 - 2010 A 'thinking winemaker's harvest', with destructive winds, unseasonable rains, heatwaves and reduced crops hitting many areas. Laterripening whites and reds, and cooler/sheltered areas seem to have fared best - but very difficult to generalise.
 - 2009 Perhaps one of the greatest Cape vintages. Both white and red look good. Standing out are the Sauvignon Blancs, Chardonnay, Riesling, Shiraz, Cabernet and Merlot.
 - 2008 Long, wet, late and challenging but also unusually cool season, favouring elegance in both reds and whites, with ripeness generally achieved at lower alcohols.
 - 2007 Elegant, structured whites, notably Sauvignon, smaller red-grape berries resulted in intense colour and fruit concentration, especially for Cabernet and Shiraz.
 - 2006 Perhaps the best white-wine vintage in a decade - particularly expressive Sauvignon and Chenin. Fleshy, mild-tannined reds, with lower alcohols all round.
 - 2005 Short, early and particularly challenging. Concentrated if alcoholic reds; mostly average whites, some stellar exceptions.
 - 2004 Cooler dry conditions yielded healthy, elegant, often age worthy wines with lower alcohols and yielding tannins. Chardonnay, Merlot and Shiraz especially promising.
 - 2003 Outstanding, especially for reds-concentrated and structured, and often slow to show their best. Difficulties with late-ripeners in some areas.
 - 2002 Challenging and patchy; generally, individual producers' track record rather than variety or terroir should guide the purchase/cellaring decision.
